## **DETAILED ACTION**

In response to Decision from Board of Patent Appeals made on April 22, 2005

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows in order to minimize confusion and clarify the record.

- a. Please cancel claims 8 – 11.

It is noted that Applicant's response ( filed May 11, 2001 ) to the restriction requirement of February 13, 2001 indicates that claims 8 – 11 were cancelled subject to the restriction requirement. However, during prosecution, the claims were always listed as withdrawn. For these reason, claims 8 – 11 are herein cancelled.

*Reasons for Allowance*

2. The following is an examiner's statement of reasons for allowance:
  - a. Claims 1 - 9 are allowable over the Prior Art of Record because it fails to teach or suggest an incline indicator for the mast of a forklift comprising an elongated activating arm secured to the upper extremity of said pendulum in orthogonal relationship to the direction of elongation of said pendulum and extending to a distal extremity located adjacent the forward edge extremity of said panel, and a straight track means associated with said interior surface adjacent said forward edge extremity and engaging said sliding member, whereby said sliding member is constrained to reciprocating linear movement in a path parallel to said forward edge extremity in combination with the remaining limitations of the claims.
  - b. Claim 10 is allowable over the Prior Art of Record because it fails to teach or suggest an incline indicator for the mast of a forklift comprising an elongated activating arm secured to the upper extremity of said pendulum in orthogonal relationship to the direction of elongation of said pendulum and extending to a distal extremity located adjacent the forward edge extremity of said panel, said distal extremity having elongated retaining means in the form of a bifurcated portion of said activating arm, and a straight track means associated with said interior surface adjacent said forward edge extremity and engaging said sliding member, whereby said sliding member is constrained to

reciprocating linear movement in a path parallel to said forward edge extremity in combination with the remaining limitations of the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
